

Rev. I 07/09/2016 KS4B//JH

Rev. 3 February 2022 KC5UN

Calling all amateur radio operators:

This is _____. My name is _____ and I am located in _____ County. I am net control station for this Thursday evening, February ____, 2022, Session of the North Alabama/Southern-Middle Tennessee SKYWARN training net. (BREAK)

This net meets weekly on Thursday evenings of each week at 8:00 P.M local time, and involves the local area link frequency, which links the 147.240 repeater near Huntsville, Alabama, the 147.09 repeater in Fabius, Alabama, 146.960 repeater near Moulton, Alabama, the 147.340 repeater near Leighton, Alabama, the 146,820 repeater in Winchester, Tennessee and the 147.030 repeater in Park City, Tennessee. (BREAK)

The purpose of this net is to practice net operations similar to those used during emergency activation. When emergency activation is required, based on operation methods outlined in our Standard Operating Procedures, this net would activate as the North Alabama and Southern Middle Tennessee SKYWARN Emergency Net. The purpose of this emergency net is to spot and track severe weather and to provide a communications network that links the counties in North Alabama and Southern Middle Tennessee to the National Weather Service office in Huntsville, Alabama. The goal of this net is to provide the citizens within the Huntsville NWS Office coverage area with the earliest possible forewarning of severe weather affecting them. (BREAK)

Be advised that during an actual emergency net, only net liaison stations from each county would check in to this net. Your counties depend highly on your participation in the local county nets. However, since this is a training net, all stations that have not checked in with a local county training net this week are encouraged to check in to this training net. If any station needs additional information about this net or needs a copy of the Standard Operating Procedures, please contact Net Control after the net. (BREAK)

This is a directed net and stations may not call other stations without consent and acknowledgement of Net Control.

This is _____, are there any stations with emergency or priority traffic for this net?

(BREAK)

At this time I will proceed with the roll call of counties in North Alabama and Southern Middle Tennessee, in alphabetical order. At the end of the roll call, I will reserve some time for out of area check-ins and late check-ins, as well as any announcements. When you check in, I ask that you check in slowly and clearly, giving your call sign phonetically, your name, your location, that is your city, town or community, and whether or not you have any traffic for this net.

This is _____ with the North Alabama and Southern Middle Tennessee SKYWARN training net calling:
